EDUCATION

Vellore Institute of Technology <i>Bachelor of Technology, Information Technology</i> CGPA: 8.80	Vellore, Tamil Nadu Aug. 2023 – Present
DAV Public School, Chandrasekharapur <i>PCM with Computer Science</i> Percentage: 90.2	Bhubaneswar, Odisha June 2020 – June 2022

EXPERIENCE

Summer Intern <i>DEAL, DRDO</i> - Worked on integrating AI into defense communication networks to enhance efficiency, resilience, and security - Explored secure system design principles and observed real-world applications of automation in mission-critical infrastructure - Learned fundamentals of research methodology, including reviewing and writing scientific articles	May 2025 – June 2025 Dehradun, India
Core Member <i>ACM Chapter</i> - Volunteered in technical and non-technical events hosted by the ACM Chapter - Supported coordination, planning, and execution of club activities	Apr. 2025 – Present VIT, Vellore
Outreach and Partnerships Head <i>Juvenile Care Club</i> - Helped organize outreach programs and contributed to event execution - Developed communication and teamwork skills through community-focused initiatives	July 2024 – Present VIT, Vellore

PROJECTS

Digital Wallet for Shared Expenses <i>HTML, CSS, JavaScript, Node.js, MongoDB</i> - Developed a full-stack web application to streamline shared expense tracking among groups - Implemented features to add, split (equally/custom), and settle expenses with real-time updates using AJAX. - Integrated MongoDB to store user, expense, and transaction data for accurate and transparent debt management. - Designed a responsive and intuitive user interface with smooth UX and efficient search functionality.	Feb 2025 – Oct 2025
Serverless FileFinder <i>AWS S3, Lambda, API Gateway, DynamoDB, IAM</i> - Built a serverless web app to upload, search, and delete files using AWS Lambda and API Gateway. - Used pre-signed URLs for secure S3 uploads and DynamoDB for fast metadata search. - Implemented least-privilege IAM roles and monitored the system with CloudWatch for reliable performance.	Oct 2025 – Dec 2025
Judicial AI System <i>Python, Flask, React, Neo4j, NLP, XGBoost</i> - Built an AI-powered legal analysis system using NLP and XGBoost to extract structured insights from case text and predict outcomes with explainable reasoning. - Developed a full-stack dashboard integrating Neo4j knowledge graphs to visualize case–statute relationships, influencing factors, and similar precedents.	Jan 2026 - Present

TECHNICAL SKILLS

Languages: Java, Python, C/C++, SQL (Postgres), JavaScript, HTML/CSS
Frameworks: React, Node.js, jQuery, AJAX, RESTful API, Express.js, Flask
Developer Tools: Git, Github, VS Code, MySQL, Neo4j
Libraries: pandas, NumPy, Matplotlib, NLP (spaCy, SentenceTransformers), XGBoost, PySpark
